Medical Necessity Guidelines

When a drug is being reviewed for coverage under a member's medical benefit plan or is otherwise subject to clinical review (including prior authorization), the following criteria will be used to determine whether the drug meets any applicable medical necessity requirements for the intended/prescribed purpose.

Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

Pegloticase (Krystexxa)

A. Prescriber Specialties

- i. N/A

B. Criteria For Initial Approval

- i. Individual is 18 years of age or older; **AND**
- ii. Individual has a diagnosis of chronic gout demonstrated by one or more of the following (Sundy 2011):
 - a. Three or more gout flares in the previous 18 months; **OR**
 - b. One or more tophus present; **OR**
 - c. History of chronic gouty arthropathy, defined clinically or radiographically as joint damage due to gout.

AND

- iii. Documentation is provided that individual has a baseline serum uric acid of 6 mg/dL or greater prior to initiating Krystexxa (pegloticase) (FitzGerald 2020); **AND**
- iv. Documentation is provided that individual has failed to respond to, is intolerant of, or has a medical contraindication to 1 or more of the following conventional therapies (FitzGerald 2020):
 - a. A xanthine oxidase inhibitor (allopurinol or febuxostat); **OR**
 - b. Combination therapy of 1 xanthine oxidase inhibitor given with a uricosuric agent (for example, probenecid); **AND**
- v. Krystexxa (pegloticase) will be administered in combination with methotrexate and folic acid/folinic acid supplementation unless contraindicated or not clinically appropriate.

C. Criteria For Continuation of Therapy

- i. There is clinically significant improvement in clinical signs and symptoms of disease (including but not limited to reduction in serum uric acid level, gout flare reduction, tophus resolution, reduction in joint pain) (Sundy 2011); **AND**
- ii. Krystexxa (pegloticase) will be administered in combination with methotrexate and folic acid/folinic acid supplementation unless contraindicated or not clinically appropriate.

D. Authorization Duration

- a. Initial Approval Duration: [Click or tap here to enter text.](#)
- b. Reauthorization Approval Duration: [Click or tap here to enter text.](#)

E. Conditions Not Covered

Any other use is considered experimental, investigational, or unproven, including the following (this list may not be all inclusive):

Policy Name	Policy Number	Scope
Krystexxa (pegloticase)	MP-RX-FP-50-23	<input checked="" type="checkbox"/> MMM MA <input checked="" type="checkbox"/> MMM Multihealth
<ul style="list-style-type: none"> i. Individual has asymptomatic hyperuricemia; OR ii. Individual has a known glucose-6-phosphate dehydrogenase (G6PD) deficiency; OR iii. Individual is using in combination with oral urate-lowering therapy (including but not limited to allopurinol, febuxostat, probenecid); OR iv. For continuation requests, the two most recent serum uric acid levels have been 6 mg/dL or greater; OR v. May not be approved when the above criteria are not met and for all other indications. 		

Policy Name	Policy Number	Scope
Krystexxa (pegloticase)	MP-RX-FP-50-23	<input checked="" type="checkbox"/> MMM MA <input checked="" type="checkbox"/> MMM Multihealth

Limits or Restrictions

A. Quantity Limitations : N/A

Approvals may be subject to dosing limits in accordance with FDA-approved labeling, accepted compendia, and/or evidence-based practice guidelines. The chart below includes dosing recommendations as per the FDA-approved prescribing information.
